4. TECHNICAL

Languages

Portuguese (native) and English (written and spoken)

HTML

Experienced in structuring mobile-ready websites and single-page apps using HTML5 or common templating languages such as Handlebars, Dust or Underscore.

CSS - Sass - Less

Strong knowledge about the most common grid layout systems such as Bootstrap and Foundation. Experienced in building responsive layouts using CSS.

JavaScript

Experienced in building modular large-scale e-commerce platforms using Node on the server and also writing clientside JavaScript functionality.

Knowledge about task automation using Grunt or Gulp and management of package dependency using NPM or Bower.

Intermediate knowledge about the workings of JavaScript frameworks/libraries like Angular, React or Backbone.

Other Skills

Used to working on a Agile Scrum workflow and cycle of delivery and also familiarized with version management software (Git mostly) to manage my work.

Knowledge about TDD implementation and patterns gained through professional training sessions.

General ease in learning new libraries or frameworks and expanding my skillset.

Strong knowledge about best UX/UI best practices and techniques.
